

All the shapes we see around us are formed using curves or lines. We can see

U

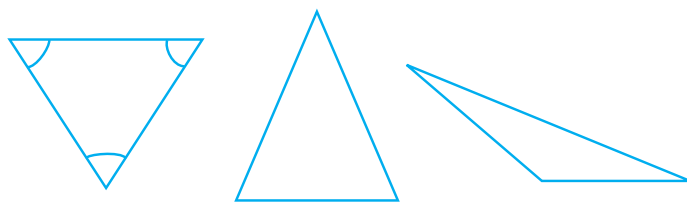

MATHEMATICS

Do you see that each one of them is less than one-fourth of a revolution? Examine them with your RA tester.

- z If an angle is larger than a right angle, but less than a straight angle, it is called an **obtuse angle**. These are obtuse angles.

Do you see that each one of them is greater than one-fourth of a revolution but less than half a revolution? Your RA tester may help to examine.
