

6.1 INTRODUCTION

A triangle, you have seen, is a simple closed curve made of three line segments. It has three vertices, three sides and three angles.

Here is

THE TRIANGLE AND ITS PROPERTIES

3. Draw any three triangles, say $\triangle ABC$, $\triangle PQR$ and $\triangle XYZ$ in your notebook (Fig 6.22).

(i)

(ii)

(iii)

Fig 6.22

Use your ruler to find the lengths of their sides and then tabulate your results as follows:

Name of Δ	Lengths of Sides	Is this True?	
ΔABC	AB ____	$AB - BC < CA$
